Plant Science, 77 (1991) 267–269
Elsevier Scientific Publishers Ireland Ltd.

Subject Index
Volume 77 (1991)

Abiotic inducers, sugars, β-D-glycanohydrolases, plant protoplasts, 41
Acid citrus, protoplast, electrofusion, somatic hybrids, plant breeding, 125
Aleurone protoplasts, barley (*Hordeum vulgare* L.), lipid bodies (oil bodies), lipid dyes, lipid mobilization, phospholids, 223
Allelopathy, in vitro culture, soybean and rice calli, inhibition on cell and callus growth, volatile inhibitory compounds, 103
Aminoacylation, under-modified tRNA, protein synthesis, greening, wheat, 173
Artificial seeds, *Brassica napus* L., desiccation tolerance, haploid embryos, thermal stress, 119
Asexual embryogenesis, embryoids, hybrid poplar, 111 ATP, *Himantormia*, dark/light, glucose, phenolics, 1

Barley (*Hordeum vulgare* L.), aleurone protoplasts, lipid bodies (oil bodies), lipid dyes, lipid mobilization, phospholids, 223
Bracken fern, chloroplast DNA, evolutionary studies, gene order, *Pteridium*, 81
Brassica napus L., desiccation tolerance, artificial seeds, haploid embryos, thermal stress, 119

Cactus lectins, plant lectins, *Machaerocereus eruca*, hydrophobic chromatography, 11
Cadmium, *Phaseolus vulgaris*, intercellular spaces, tissues, Cd-binding protein, 139
Calcium-dependent enzyme, kinase, phosphorylation, phospholipid, phospholipid-dependent enzyme, *Neurospora crassa*, 67
Cd-binding protein, cadmium, *Phaseolus vulgaris*, intercellular spaces, tissues, 139
Cell death, *Daucus carota*, suspension cultures, elicitor, phytoalexin, hypersensitive response, 261
Ceratocystis ulmi, growth, spores germination, polyamines, 131
Cereal leaf cells, patterns of competence, plant regeneration, 243
Chicory, *Cichorium intybus*, invertase, sucrose metabolism, sucrose phosphate synthase, 191
Chloroplast differentiation, tobacco cell suspension, cytokinin polypeptide markers, 2D-electrophoresis quantification, light, 29
Chloroplast DNA, evolutionary studies, gene order, bracken fern, *Pteridium*, 81
Cicer arietinum, α-galactosidase, cotyledons, isoenzymes, 185
Cicer arietinum L. cv 'Castellana', exogenous calcium, exogenous cytokinins, endogenous cytokinins, seed germination, 207
Cichorium intybus, chicory, invertase, sucrose metabolism, sucrose phosphate synthase, 191
Cotton roots, iron stress, plasmalemma vesicles, plasmalemma redox activity, 163
Cotyledons, *Cicer arietinum*, α-galactosidase, isoenzymes, 185
Cultured carrot cells, enzyme purification, β-1,3-glucanase, glycoprotein, wall-bound enzyme, 21
Cynara scolymus L. protoplast, suspension culture, globe artichoke, 253
Cytokinin polypeptide markers, tobacco cell suspension, chloroplast differentiation, 2D-electrophoresis quantification, light, 29

2D-electrophoresis quantification, tobacco cell suspension, cytokinin polypeptide markers, chloroplast differentiation, light, 29
Dark/light, *Himantormia*, ATP, glucose, phenolics, 1
Daucus carota, suspension cultures, elicitor, phytoalexin, cell death, hypersensitive response, 261
Depsidone ether hydrolase, *Pseudevernia furfuracea*, 5′-hydroxyolivetoric acid, physodic acid, 197
Desiccation tolerance, *Brassica napus* L., artificial seeds, haploid embryos, thermal stress, 119
Drechslera gigantea, eremophilanes, petasol, gigantenone, oats, green islands, 155

Electrofusion, protoplast, somatic hybrids, acid citrus, plant breeding, 125
Elicitor, *Daucus carota*, suspension cultures, phytoalexin, cell death, hypersensitive response, 261
Embryoids, asexual embryogenesis, hybrid poplar, 111
Endogenous cytokinins, *Cicer arietinum* L. cv 'Castellana', exogenous calcium, exogenous cytokinins, seed germination, 207
Enzyme purification, cultured carrot cells, β-1,3-glucanase, glycoprotein, wall-bound enzyme, 21
Epitope, monoclonal antibodies, ribulose 1,5-bisphosphate carboxylase/oxygenase, *Nicotiana plumbaginifolia*, immunochemistry, 57
Eremophilanes, petasol, gigantenone, oats, *Drechslera gigantea*, green islands, 155
Evolutionary studies, chloroplast DNA, gene order, bracken fern, *Pteridium*, 81
Exogenous calcium, *Cicer arietinum* L. cv 'Castellana', exogenous cytokinins, endogenous cytokinins, seed germination, 207

Exogenous cytokinins, *Cicer arietinum* L. cv 'Castellana', exogenous calcium, endogenous cytokinins, seed germination, 207

Fructose-2,6-bisphosphate, pyrophosphate:fructose-6-phosphate phosphotransferase, wound-induced respiration, 177

α-Galactosidase, *Cicer arietinum*, cotyledons, isoenzymes, 185
Gelling agent, *Picea rubens*, *Picea mariana*, somatic embryogenesis, maturation, 233
Gene order, chloroplast DNA, evolutionary studies, bracken fern, *Pteridium*, 81
Germination, tomato, seeds, indole-3-acetic acid, *N*-malonyl-D-tryptophan, tryptophan, 149
Gigantenone, eremophilanes, petasol, oats, *Drechslera gigantea*, green islands, 155
Globe artichoke, *Cynara scolymus* L. protoplast, suspension culture, 253
β-1,3-Glucanase, cultured carrot cells, enzyme purification, glycoprotein, wall-bound enzyme, 21
Glucose, *Himantormia*, ATP, dark/light, phenolics, 1
β-D-Glycanohydrolases, sugars, abiotic inducers, plant protoplasts, 41
Glycine max, hydrolytic enzymes, peribacteroid space, periplasmic space, 47
Glycoprotein, cultured carrot cells, enzyme purification, β-1,3-glucanase, wall-bound enzyme, 21
Greening, under-modified tRNA, protein synthesis, aminoacylation, wheat, 173
Green islands, eremophilanes, petasol, gigantenone, oats, *Drechslera gigantea*, 155
Growth, *Ceratocystis ulmi*, spores germination, polyamines, 131

Haploid embryos, *Brassica napus* L., desiccation tolerance, artificial seeds, thermal stress, 119
Himantormia, ATP, dark/light, glucose, phenolics, 1
Hybrid poplar, embryoids, asexual embryogenesis, 111
Hydrolytic enzymes, *Glycine max*, peribacteroid space, periplasmic space, 47
Hydrophobic chromatography, plant lectins, cactus lectins, *Machaerocereus eruca*, 11
5′-Hydroxyolivetoric acid, *Pseudevernia furfuracea*, depsidone ether hydrolase, physodic acid, 197
Hypersensitive response, *Daucus carota*, suspension cultures, elicitor, phytoalexin, cell death, 261

Immunochemistry, monoclonal antibodies, ribulose 1,5-bisphosphate carboxylase/oxygenase, *Nicotiana plumbaginifolia*, epitope, 57
Indole-3-acetic acid, tomato, seeds, germination, *N*-malonyl-D-tryptophan, tryptophan, 149
Inhibition on cell and callus growth, allelopathy, in vitro culture, soybean and rice calli, volatile inhibitory compounds, 103
Intercellular spaces, cadmium, *Phaseolus vulgaris*, tissues, Cd-binding protein, 139
Invertase, chicory, *Cichorium intybus*, sucrose metabolism, sucrose phosphate synthase, 191
In vitro culture, allelopathy, soybean and rice calli, inhibition on cell and callus growth, volatile inhibitory compounds, 103
Iron stress, cotton roots, plasmalemma vesicles, plasmalemma redox activity, 163
Isoenzymes, *Cicer arietinum*, α-galactosidase, cotyledons, 185

Kinase, phosphorylation, phospholipid, calcium-dependent enzyme, phospholipid-dependent enzyme, *Neurospora crassa*, 67

Light, tobacco cell suspension, cytokinin polypeptide markers, chloroplast differentiation, 2D-electrophoresis quantification, 29
Lipid bodies (oil bodies), aleurone protoplasts, barley (*Hordeum vulgare* L.), lipid dyes, lipid mobilization, phospholids, 223
Lipid dyes, aleurone protoplasts, barley (*Hordeum vulgare* L.), lipid bodies (oil bodies), lipid mobilization, phospholids, 223
Lipid mobilization, aleurone protoplasts, barley (*Hordeum vulgare* L.), lipid bodies (oil bodies), lipid dyes, phospholids, 223

Machaerocereus eruca, plant lectins, cactus lectins, hydrophobic chromatography, 11
Maize, *Mutator*, shrunken gene, Southern blot, transposable elements, 93
N-Malonyl-D-tryptophan, tomato, seeds, germination, indole-3-acetic acid, tryptophan, 149
Maturation, *Picea rubens*, Picea mariana, somatic embryogenesis, gelling agent, 233
Monoclonal antibodies, ribulose 1,5-bisphosphate carboxylase/oxygenase, *Nicotiana plumbaginifolia*, 57
Mutator, maize, shrunken gene, Southern blot, transposable elements, 93

Neurospora crassa, kinase, phosphorylation, phospholipid, calcium-dependent enzyme, phospholipid-dependent enzyme, 67
Nicotiana plumbaginifolia, monoclonal antibodies, ribulose 1,5-bisphosphate carboxylase/oxygenase, 57

Oats, eremophilanes, petasol, gigantenone, *Drechslera gigantea*, green islands, 155

Patterns of competence, cereal leaf cells, plant regeneration, 243
Peribacteroid space, *Glycine max*, hydrolytic enzymes, periplasmic space, 47
Periplasmic space, *Glycine max*, hydrolytic enzymes, peribacteroid space, 47
Petasol, eremophilanes, gigantenone, oats, *Drechslera gigantea*, green islands, 155
Phaseolus vulgaris, cadmium, intercellular spaces, tissues, Cd-binding protein, 139
Phenolics, *Himantormia*, ATP, dark/light, glucose, 1

Phospholids, aleurone protoplasts, barley (*Hordeum vulgare* L.), lipid bodies (oil bodies), lipid dyes, lipid mobilization, 223
Phospholipid, kinase, phosphorylation, calcium-dependent enzyme, phospholipid-dependent enzyme, *Neurospora crassa*, 67
Phospholipid-dependent enzyme, kinase, phosphorylation, phospholipid, calcium-dependent enzyme, *Neurospora crassa*, 67
Phosphorylation, kinase, phospholipid, calcium-dependent enzyme, phospholipid-dependent enzyme, *Neurospora crassa*, 67
Physodic acid, *Pseudevernia furfuracea*, depsidone ether hydrolase, 5′-hydroxyolivetoric acid, 197
Phytoalexin, *Daucus carota*, suspension cultures, elicitor, cell death, hypersensitive response, 261
Picea mariana, *Picea rubens*, somatic embryogenesis, maturation, gelling agent, 233
Picea rubens, *Picea mariana*, somatic embryogenesis, maturation, gelling agent, 233
Plant breeding, protoplast, electrofusion, somatic hybrids, acid citrus, 125
Plant lectins, cactus lectins, *Machaerocereus eruca*, hydrophobic chromatography, 11
Plant protoplasts, sugars, abiotic inducers, β-D-glycanohydrolases, 41
Plant regeneration, cereal leaf cells, patterns of competence, 243
Plasmalemma redox activity, cotton roots, iron stress, plasmalemma vesicles, 163
Plasmalemma vesicles, cotton roots, iron stress, plasmalemma redox activity, 163
Polyamines, *Ceratocystis ulmi*, growth, spores germination, 131
Protein synthesis, under-modified tRNA, aminoacylation, greening, wheat, 173
Protoplast, *Cynara scolymus* L. suspension culture, globe artichoke, 253
Protoplast, electrofusion, somatic hybrids, acid citrus, plant breeding, 125
Pseudevernia furfuracea, depsidone ether hydrolase, 5′-hydroxyolivetoric acid, physodic acid, 197
Pteridium, chloroplast DNA, evolutionary studies, gene order, bracken fern, 81
Pyrophosphate:fructose-6-phosphate phosphotransferase, fructose-2,6-bisphosphate, wound-induced respiration, 177

Ribulose 1,5-bisphosphate carboxylase/oxygenase, monoclonal antibodies, *Nicotiana plumbaginifolia*, 57 Seeds, tomato, germination, indole-3-acetic acid, *N*-malonyl-D-tryptophan, tryptophan, 149

Seed germination, *Cicer arietinum* L. cv 'Castellana', exogenous calcium, exogenous cytokinins, endogenous cytokinins, 207
Shrunken gene, maize, *Mutator*, Southern blot, transposable elements, 93
Somatic embryogenesis, *Picea rubens*, *Picea mariana*, maturation, gelling agent, 233
Somatic hybrids, protoplast, electrofusion, acid citrus, plant breeding, 125
Southern blot, maize, *Mutator*, shrunken gene, transposable elements, 93
Soybean and rice calli, allelopathy, in vitro culture, inhibition on cell and callus growth, volatile inhibitory compounds, 103
Spores germination, *Ceratocystis ulmi*, growth, polyamines, 131
Sucrose metabolism, chicory, *Cichorium intybus*, invertase, sucrose phosphate synthase, 191
Sucrose phosphate synthase, chicory, *Cichorium intybus*, invertase, sucrose metabolism, 191
Sucrose synthase, chicory, *Cichorium intybus*, invertase, sucrose metabolism, sucrose phosphate synthase, 191
Sugars, abiotic inducers, β-D-glycanohydrolases, plant protoplasts, 41
Suspension culture, *Cynara scolymus* L. protoplast, globe artichoke, 253
Suspension cultures, *Daucus carota*, elicitor, phytoalexin, cell death, hypersensitive response, 261

Thermal stress, *Brassica napus* L., desiccation tolerance, artificial seeds, haploid embryos, 119
Tissues, cadmium, *Phaseolus vulgaris*, intercellular spaces, Cd-binding protein, 139
Tobacco cell suspension, cytokinin polypeptide markers, chloroplast differentiation, 2D-electrophoresis quantification, light, 29
Tomato, seeds, germination, indole-3-acetic acid, *N*-malonyl-D-tryptophan, tryptophan, 149
Transposable elements, maize, *Mutator*, shrunken gene, Southern blot, 93
Tryptophan, tomato, seeds, germination, indole-3-acetic acid, *N*-malonyl-D-tryptophan, 149

Under-modified tRNA, protein synthesis, aminoacylation, greening, wheat, 173

Volatile inhibitory compounds, allelopathy, in vitro culture, soybean and rice calli, inhibition on cell and callus growth, 103

Wall-bound enzyme, cultured carrot cells, enzyme purification, β-1,3-glucanase, glycoprotein, 21
Wheat, under-modified tRNA, protein synthesis, aminoacylation, greening, 173
Wound-induced respiration, fructose-2,6-bisphosphate, pyrophosphate:fructose-6-phosphate phosphotransferase, 177

Plant Science, 77 (1991) 271
